github.com/venu-rm

Full-stack developer with 3 years of experience building performant, SEO-friendly web applications with React.js/Next.js frontends and Laravel/MySQL backends. Built custom CRM portals, admin dashboards, and client facing platforms with complex data workflows, and improved page load performance by up to 90% with code splitting and optimized APIs. Experienced with REST API implementation, secure auth (JWT/OAuth) and automating business processes with MCP based AI.

PROFESSIONAL EXPERIENCE

Full-stack Developer, Vilva Business | Dec 2023 - Present

- Delivered 20+ full-stack web applications in Fintech, CRM, e-commerce, and ed-tech domains using React.js, Next.js, PHP, and Laravel.
- Developed 40+ responsive landing pages with animated UI and SEO optimization to improve organic visibility and page load speed.
- Designed and implemented MySQL-backed backend architecture with secure authentication and data encryption standards across all client platforms.

Client Projects (under Vilva Business, 2023–Present) :

TRANSACTION SERVICE PROVIDER (TSP) | RINSOPAY.IN

- Engineered fintech dashboards handling secure transaction workflows for a payment gateway platform supporting merchant onboarding, UPI collections, instant payouts, and real-time transaction analytics.

TASK MANAGEMENT PORTAL – VILVA TASKSPACE

- Designed and built an MCP (Model Context Protocol) server exposing 27 tools, allowing AI agents to manage tasks, projects, and reports directly – including a fallback-chain AI task parser (Claude CLI → Anthropic API → rule-based NLP) for natural-language task creation.
- Architected a full-stack project/task management platform (Laravel 11 + React 19) with a drag-and-drop kanban board, subtasks, dependencies, milestones, sprints, and multi-workspace support for managing multiple business units within a single application.

ABACUS EXAM PORTAL – XTRAGENIUS

- Created a student assessment platform for 500+ learners across 10+ franchise centers, automating grading via a custom expression evaluator and cutting manual review time by ~70%.
- Built an admin dashboard managing students, franchise centers, and question banks, including bulk hall-ticket PDF generation, Excel-based bulk question import, Razorpay payment integration, and a Next.js marketing site with hand-rolled scroll/interaction animations.

ENTERPRISE ERP SYSTEM – AMITY TECHNOLOGY

- Built a full-featured ERP covering Inventory & Procurement, including a multi-stage BQ BOM → Tender BOM → Procurement BOM conversion pipeline, quotations, purchase orders, and tender/sales tracking.
- Developed an HRM module with GPS-geofenced attendance tracking, shift scheduling, leave/permission workflows, and payroll processing.
- Delivered a CRM module covering leads, follow-ups, deals, and customer management, with role-based access control applied across all modules.

SKILLS

Frontend : React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, HTML5, CSS3, Redux Toolkit, Responsive UI, Vite, Animations, SEO Optimization.

Backend : PHP, Laravel, Node.js, REST APIs, Authentication (JWT/Sanctum), Server-Side Development.

Database : MySQL, Database Design, Query Optimization.

Tools : Git, GitHub, Postman, Figma, VS Code, Agile Development.

AI & Automation : MCP (Model Context Protocol) Server Development, AI-Assisted Task Parsing, Anthropic API Integration, Claude Code.

Soft Skills : Client Communication, Requirement Gathering, Cross-functional Collaboration, Team Leadership.

EDUCATION

M.Sc. Computer Science - 2023

Annai Velankanni College, Kanyakumari, MS University | **CGPA: 8.07**

B.Sc. Computer Science - 2021

Annai Velankanni College, Kanyakumari, MS University | **CGPA: 7.06**

TRAINING & CERTIFICATIONS

- Completed **Full-stack Web Development** training at Login360, Chennai, gaining practical experience in modern web development.
- Completed a 1-month online **Front-End Developer internship** at Novi Tech, gaining hands-on experience in building responsive user interfaces.
